Engineered & Packaged Solutions

We utilize our extensive knowledge of liquid ring technology and decades of application expertise to design innovative, and reliable systems for the most demanding Offshore oil & gas applications.

From packaged systems such as flare gas recovery systems, and our vapor recovery units, to completely customized packaged solutions, Garo is the name you can trust for efficient, reliable systems that perform under the most demanding conditions.

- Experienced Oil & Gas Application Engineers
- Optimum Solutions For Your Process
- Lower Operating Costs
- Lower Maintenance Costs
- Environmental compliance
- Industry Compliance: API 681 & 682, NEMA, IEEE, ATEX, HEI
- Local Content,
- Certifications and project specifications,
- Global Sales & Engineering Support
- Regional Manufacturing & Assembly Centers
- Compact Modularized Design

Package for FPSOs
